POLISTAR KK 8000 VED

The professional cutlery drying and polishing machine ...

- polishes approx. 8.000 pieces per hour.
- dries your cutlery stainlessly clean and shiny.
- sterilizes your cutlery hygienically neat (HACCP).
- saves time and staff costs.
- pays off its costs in a very short period of time.
- keeps the running costs extremly low.
- is easy to operate
- and almost maintenance-free.

The working process is automated and very easy.

The clean, wet cutlery is loaded into the cutlery drying and polishing machine POLISTAR KK 8000 VED and goes a helical way in a vibration bulk, which is filled with a pure vegetal product.
This granulate which is always at a constant warm temperature enables to dry and to polish the cutlery. The humidity absorbed by the granulate evaporates as well.

After a short period of time the cutlery comes out perfectly dry and shiny - no matter if it is silver or steel.
The radiation of an integrated UVC lamp sterlizes constantly the surface of both the cutlery and the drying granulate.

The technical novelties of the POLISTAR KK 8000 VED ... combine all improvements requested by users:

- keypad
- IPX 5 hose-proof
- Electronic temperature control to optimize the drying process
- Control of all components with digital read out of error code
- Readout of granulate exchange and maintenance
- operational test of UCV lamp
- PC-interface
- big display, 7 languages selectable
- Heat recovery in the hot-air-heating system to minimize the connected load and current consumption

Technical Data

Size (L x D x H in mm):	635x740x750/795
Weight:	190 kg
Power:	2.153 W
Voltage:	230 V / 50 Hz
Productivity per h:	max. 8.000 pieces
